Question 1 of 25

00:24:53

Given a piece of work to be executed in agile, how would you form the agile team?

Select the correct option(s) and click Submit.

- ☐ An agile team must have the required skills. Team size will depend on scope and budget.
- ☒ An agile team must have the required skills, headcount being less than 12.
- ☐ An agile team must have experienced people, headcount not exceeding 9.
- ☐ An agile team must have mix of experienced associates and freshers with right skills. Team size will depend on scope and budget.

Question 2 of 25

00:23:55

What happens if the offshore team members are not able to participate in the iteration demo due to time zone/infrastructure issues?

Select the correct option(s) and click Submit.

- ☐ No issues. Onsite members can have the iteration demo with the Product Owner/Stakeholders - it is a single team anyway.
- ☒ Offshore members will miss the opportunity to interact with the Product Owner/Stakeholders and get the direct feedback about the increment they created.
- ☐ No major issue. Since offshore Lead and onsite members participate in the demo with the Product Owner/Stakeholders, they can cascade the feedback back to the offshore members.
- ☐ It is a loss as the offshore members will not be able to contribute to ideas related to way of working.

Question 3 of 25

00:23:38

For any meeting (other than the agile events) that team members have among them, what are the points to consider? Select the two correct options.
Select the correct option(s) and click Submit.

- ☒ Team must keep number of such meetings minimal.
- ☐ Team must not allow such meetings to go beyond an hour.
- ☒ Team must keep duration of such meetings short and timebox based on the agenda.
- ☐ Team meetings (other than agile events) need not be timeboxed.

Question 7 of 25

00:22:49

How does the team know what to work upon during the iteration?
Select the correct option(s) and click Submit.

- ☐ The team participates in the iteration planning during which the Lead/Onsite coordinator/Facilitator decides who would work on what.
- ☒ Based on the discussions during iteration planning, team members agree on what each would work on.
- ☐ The Facilitator has regular interaction with the Product Owner. He/she guides the team on the tasks to be taken up.
- ☐ Iteration plans are shared by Product Owner beforehand; any spill over from last iteration is taken up by default.
